DESCRIPTION

The Tailgate Dust Restrictor Kit for the Ford Ranger is a custom designed product, installed around the cargo box and tailgate opening areas. The product is designed to significantly restrict dust and water spray ingress, helping to keep tools and equipment dust free and moisture free.

The kit includes; three (3) major components – left and right side assemblies and one lower tailgate sealing strip.

Designed and manufactured in Australia, with two kits compatible for with or without reversing camera options. Also compatible with Ford Canopies (by Aeroklas), most hard lids, and soft tonneau covers.

FORD ACCESSORIES DUST RESTRICTOR KIT

FEATURES & BENEFITS

- 1 › **Side Seal Asy** - Seals include a custom moulded corner, integrated perfectly with the lower tailgate seal strip to ensure all air paths are blocked.
 - 2 › **Dust and water reduction** - The unique dual hardness rubber strip locks perfectly into the lower portion of the side seals to prevent air paths emerging, therefore reducing dust and water ingress into the canopy.
- › **Reversing camera** - Two kits available with or without provision for reversing camera.
 - › **Fast install** - Simple installation, means short install time.
 - › **Cargo Loading protection** - The steel side ratchet provides stable mounting for the soft rubber and protects it from side cargo loading damage. The lower tailgate seal sits below the tailgate surface to protect against cargo damage when loading/ sliding across the tailgate.
 - › **Accessory integration** - When fitted with an Aeroklas Canopy, seal wedges are provided to enhance complete sealing protection. Ideal in combination with Aeroklas Draw system & Aeroklas Canopy for maximum performance.
 - › **Compatibility** - Compatible with Canopies (by Aeroklas), Hard Lids, and soft tonneau covers.
