

FORD RANGER VORTEX ROOF RACK BY AEROKLAS

JUNE 2018

VORTEX PART NUMBERS

DOUBLE CAB

VGB3Z9955106G

SUPER CAB

VGB3Z9955106E

DESCRIPTION

Aeroklas and Rhino-Rack have jointly engineered a robust solution for canopy roof loading requirements. The roof rack systems are externally fitted, and made from high quality alloy and composite materials designed to carry heavy loads (up to max 80kg).

The Vortex is designed for recreational applications with low drag and wind noise reduction.

Each kit includes tracks, cross bars and legs, with vortex cross bars.

Having a Aeroklas roof rack system means having flexibility, with a multitude of compatible Rhino-Rack accessories.

FORD RANGER ACCESSORIES VORTEX ROOF RACK

FEATURES & BENEFITS

- 1 › **Clever design** - Aerodynamically shaped for low drag and wind noise reduction. Track mounted design offers fully adjustable.
- 2 › **Load rating** - 80kg (dynamically tested).
 - › **Removable and secure** - Quickly and easily removed leaving a low track profile in place. Secure core locking end cap that is also master key compatible.
- 3 › **Design standards** - Engineered & tested to meet AS1235-2000 and ADR 42-04 safety requirements for passenger cars and/or light commercial vehicles. Designed for general roof bars to carry load, excluding magnetic and vacuum-fixed devices.
 - › **Accessories available** - Extensive range of Rhino-Rack accessories available
